Jim,

The designer was just inquiring one more time regarding the new fume hood going in N 247A. If there is any additional information you need me to know about requirement for the new hood please let me know.

Thanks,

Stephen

Mitsu,

See below for information regarding security doors at Umass DPH office.

The fume hood that we are planning to specify is made by Mott Manufacturing and distributed by New England Casework. Please see the following website for standards for fume hoods developed by Umass EH&S.

<http://www.ehs.umass.edu/fume-hood.html>

Please also see the following section of the Umass Design Guidelines:

2.8.7 SPECIAL EXHAUST SYSTEMS

I am hoping that you can mark up the attached specification with requirements that affect the airflow.

Stephen,

If DPH has specific requirements beside the electrical outlet regarding the fume hood materials or operation, they need to give us those requirements. They are the folks who will be using it and may have requirements beyond what has been discussed with Jim Hanchett. The attached User Guide has a little more information on materials and features of the fume hoods. Although we will have the shop drawing as our last chance at correcting requirements for the fume hood, I would prefer to get it bid properly.

Kevin,

I am having discussions with DPH and our PP regarding card access for securing spaces. I hope to know shortly what doors need card access and who installs it. I'll pass the information along so you can coordinate with your drawings.

Stephen
